

Region 4 ROAC Prioritization Survey Results

Responses by County

Forty-eight people responded to the survey. The greatest number of responses came from **Morgan**, **Logan**, and **Sedgwick** counties.

Note: Individuals could select more than one county to represent. This increases the reported number to above 48.

Responses by Sector

Twenty-Seven individuals with lived experience with substance use responded to the survey.

Note: Individuals could select more than one sector to represent. This increases the reported number to above 48. "Lived Experience" includes a combination of individuals with their own lived experiences as well as those who have cared for a person with OUD/SUD.

Prioritization Rankings

There were 17 total responses for treatment strategies. Not everyone responded to each strategy.

Treatment for specialized populations and efforts to retain providers were the highest ranked treatment strategies.

Criminal Justice

There were 16 total responses for criminal justice strategies. Not everyone responded to each strategy.

Comments for the ROAC

"I believe the council has been good about ensuring the grant "seed" money is prioritized to sustainable programs; but I think it needs to be considered more towards newer smaller non-profit providers that have even more limited access to funding sources bur are actively engaging in community work."

> "Funding for housing for people in recovery that may have a criminal background prohibiting them from getting appropriate housing [is a need]. A sober apartment complex or neighborhood for people in recovery to live [would be helpful]. Sober events, meetings, and gatherings for that community [should also be supported]."

"Often times [substance use] is a person's attempt to fix a problem in their life that already existed be that coping with a mental issue, an environmental issue or some kind of physical issue. As much as prevention and recovery are important, finding out what draws a person to drug use and addressing that underlying cause is often overlooked."
